Methodology
The survey was commissioned by the Digital Advertising Alliance and conducted via SurveyMonkey among 1,109 US adults from February 17-21, 2024. Based on a confidence interval of 95 percent, the margin of error for the survey is +/- 3 percent.
By more than a two-to-one margin, respondents said the AdChoices icon should be used for both existing and new choices about ads vs. developing new icons.

Q7: The advertising industry is constantly innovating to better connect with consumers and deliver relevant advertising to them. Which of these statements is closer to your view on how companies should provide information and choices about ads in the future?

- **72%**
  The AdChoices icon should include both existing and new choices around advertising, so consumers have a single, centralized location for ad-related information and choices.

- **28%**
  Different and separate icons should be developed for new choices, even if consumers have to use multiple tools to get information and express their choices.

**Methodology**
The survey was commissioned by the Digital Advertising Alliance and conducted via SurveyMonkey among 1,109 US adults from February 17-21, 2024. Based on a confidence interval of 95 percent, the margin of error for the survey is +/- 3 percent.
By a similar margin, respondents said new laws should encourage companies to use the AdChoices icon vs. creating new icons/tools.

Q8: Congress and some states are considering new laws or regulations around privacy and advertising. Which of these statements is closer to your view on how new laws or regulations should help consumers find information and choices about advertising:

- Proposed laws or regulations should encourage companies to use existing tools such as the AdChoices icon because they are widely recognized, adopted, and understood. (70%)
- Proposed laws or regulations should create new and different-looking icons or tools that provide similar functionality, even if they cause consumer confusion. (28%)
Three quarters said it would be confusing if there were multiple icons that provided similar types of information/choices about ads.

Q9: How confusing would it be if there were multiple different-looking icons providing similar types of information and choices about advertising?

- Somewhat confusing: 47%
- Very confusing: 28%
- Not very confusing: 20%
- Not at all confusing: 6%
